Decipher

Origination & Underwriting Platform
Streamline Lending From Start to Funding

Decipher Origination

Designed to streamline the entire loan application and approval process. Capture new clients through a digital client portal and manage the flow of deals between all internal and external teams, including sales, underwriting, brokers, partners, and other collaborators, all in one place.

Decipher Underwriting

Automates the approval process, including automated risk scoring, credit and background reports, financial spreading, bank account transaction analysis, UCC search and file, document management, and much more to improve lending decisions.

Decipher

Origination & Underwriting Platform
The Most Robust Features

Decipher Decisioning

Automate pre-approval, using prospect, business and third-party data combined with our underwriting engine for real-time decisions.

Decipher Workflows

Customize the client journey for each type of financing product. Guide clients down the right path while improving response times and internal coordination.

Decipher Monitoring

Directly connect to client bank accounts and accounting systems for instant analysis and monitoring to speed up approval and reduce risk.

Decipher Documents

Autofill all closing documents, including agreements, credit memo, and tax forms and send for E-signature. Store and manage all documents needed to close a deal and track them in our digital checklist system.
